

rPlay on Raspberry Pi -> no AirPlay icon on iPhone

Posted by Unrender - 2013/09/16 19:38

Hi,

I followed the tutorial and rPlay is running. I activated the license using the ethernet IP address. I feel like I've followed every step, but I don't see any Airplay options on my iPhone. I even try to boot the iPhone in Safe Mode, change from Raspbian to Xbian on the Pi.

Any idea to fix my problem ?

Thanks.

i have the same problem!

```
root@raspberrypi:~# ALSA lib pcm.c:2217:(snd_pcm_open_noupdate) Unknown PCM cards.pcm.front
*** WARNING *** The program 'rplay' uses the Apple Bonjour compatibility layer of Avahi.
*** WARNING *** Please fix your application to use the native API of Avahi!
*** WARNING *** For more information see
```

no airplay button / macbook pro / iphone / ipad :/

Also having the same problem.

```
pi@raspberrypi ~ $ sudo /etc/init.d/rplay start
```

```
Starting rplay:.
```

```
pi@raspberrypi ~ $ ALSA lib pcm.c:2217:(snd_pcm_open_noupdate) Unknown PCM cards.pcm.front
```

```
*** WARNING *** The program 'rplay' uses the Apple Bonjour compatibility layer of Avahi.
